Kirrawee History

- *Kirrawee means “place of white cockatoos”.
- *the only famous thing in Kirrawee was the Brick Pit and it is no there any more, in so Kirrawee has got nothing
- *when I Googled Kirrawee Brick Pit to get info for my talk, I got a café called The Brick Pit
- *it opened in 1912 – 112 years ago, the Brick Pit not the café
- *Holeproof remembers the opening well – there were elephant rides, a sideshow alley, sample bags with bricks in them and a young up and coming band from the UK – The Rolling Stones – Mick Jagger was just a boy
- *Holeproof tells me she rooted a young brickmaker next to the furnace – hot stuff
- *when the Brick Pit closed in 1968, the buildings were knocked down and all that was left was a very big hole in the ground which became a lagoon
- *it took many years of controversy to get to what it is today – a place for immigrants from St George area to settle – Slotcard
- *average house price in Kirrawee \$1.5 million, average unit price \$780k
- * one infamous ex resident is Beau Lamare-Condon, the police officer who allegedly shot and killed his ex-lover and his boyfriend a few months ago
